Mysuru / Bengaluru (Hybrid)

CORE SKILLS

PYTHON
Pandas · NumPy · Plotly · Streamlit · Matplotlib

ETL & SQL
Python ETL · SQL Joins · CTEs · Window Fns · Validation

BI & DASHBOARDS
Power BI · Streamlit · KPI Design

ML & NLP
NLP · NER · Transformers · YOLOv5 · TensorFlow · PyTorch

WAREHOUSE & TOOLS
Star Schema · OLAP · Git · Linux · VS Code · OpenAI API

EDUCATION

MCA — Computer Science & Engineering
NIE, Mysuru
2022–2024 · CGPA: 8.12/10

B.Sc — CS, Maths & Statistics
Yuvaraja's College, Mysuru
2018–2021 · CGPA: 6.97/10

ETL|OLAP|SQL|Python|Power BI|Streamlit|Pandas|NumPy|KPI|MIS|Data Pipelines|NLP|ML|Anomaly Detection|Forecasting|Data Warehousing|Linux|Business Reporting|Informatica|Talend

PROFESSIONAL SUMMARY

Data Analytics Developer with **1+ year of experience** building ETL pipelines, KPI dashboards, and automated analytics solutions. Delivered measurable results — improved data accuracy by **25%** and reduced reporting effort by **30%** at VisionVerse Technology. Strong in **Python (Pandas, NumPy)**, SQL, and BI tools (Power BI, Streamlit), with hands-on ETL development and data quality auditing at scale. Background in NLP and ML with a **92% accuracy NER model** and three live production dashboards.

WORK EXPERIENCE

Data Analyst
Jan 2025 – Jan 2026
VisionVerse Technology · Mysuru

- Built Python ETL pipelines to extract, validate, transform, and load large-scale 3D LiDAR annotation datasets supporting AI training workflows.
- Deployed a Streamlit KPI dashboard for real-time monitoring of team performance, annotation accuracy, and SLA compliance. (visonversedashboard.streamlit.app)
- Automated WBR-style weekly reports using Python & Google Sheets API — **reduced manual reporting effort by 30%**.
- Performed root cause analysis on data quality issues — **improved annotation accuracy by 25%**.
- Designed KPIs: task completion rate, error rate, labeling throughput, and rework metrics.
- Executed SQL validation queries for data quality audits and analytics reporting to stakeholders.

Machine Learning Intern
May 2024 – Jul 2024
Qikk Automation Technology · Koorgally

- Prepared, cleaned, and validated NLP datasets for Named Entity Recognition (NER) model training.
- Engineered an NER model achieving **92% accuracy** using structured, validated datasets.
- Built a Transformer-based key-value extraction pipeline; supported AI model testing and production integration.

PROJECTS

GRS Fantasy Park — MIS Command Center
↗ grsdashboard.streamlit.app
Python · Streamlit · Pandas · Plotly · ML Forecasting
Multi-module MIS dashboard with revenue tracking, footfall analytics, ML demand forecasting, anomaly detection, and automated KPI reporting.

AI Financial Analytics Dashboard
↗ aifinancialdashboard.streamlit.app
Python · Pandas · Streamlit · Plotly
End-to-end financial analytics platform with ETL workflows, KPI calculations (revenue, profit margin, MoM growth), and interactive visualizations.

Operational KPI Dashboard — Production
↗ visonversedashboard.streamlit.app
Python · Streamlit · Google Sheets API
Real-time annotation KPI tracker used daily by management. Automated ETL and data ingestion pipeline.

Computer Vision Pipeline
YOLOv5 · Kalman Filters · Streamlit · Pywhatkit
Real-time object detection & speed estimation pipeline achieving 95%+ detection precision with automated WhatsApp alert integration.
